

# Make a fun pencil pot!

## Items you will need

scissors

template

felt pens

glue

paper cup

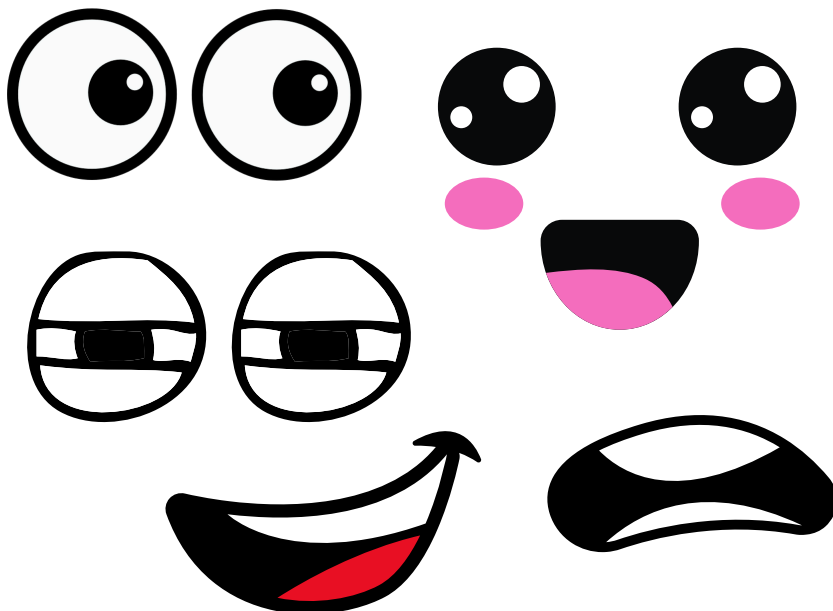

## Instructions (your grown-up can help)

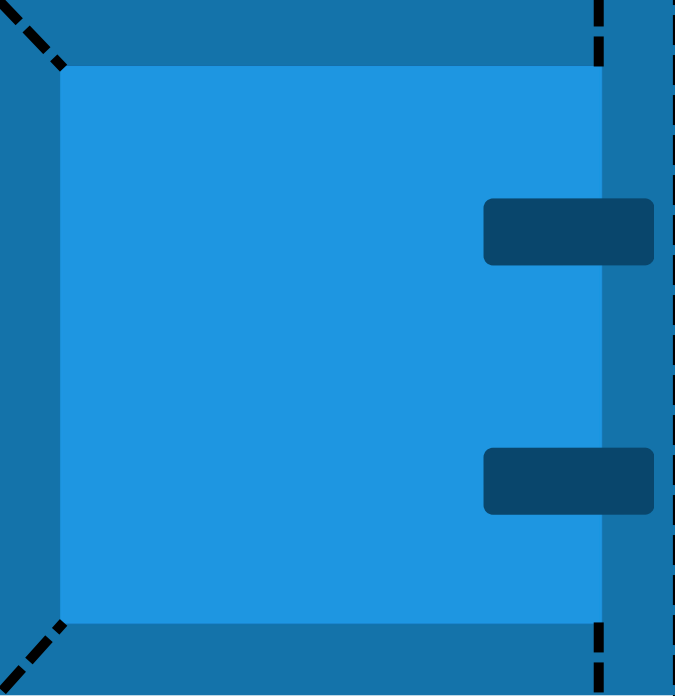

1. In this fun project you will create your very own pencil pot recycle bin!
2. Glue the template to an A4 piece of card. There are marks on the template showing where to cut and add glue. The paper cup hides inside, this will keep your pens and pencils together.

Look at the photo above for reference.

Colour and cut the wheels and the recycle sign, or try your own fun signs. You could even add a face!

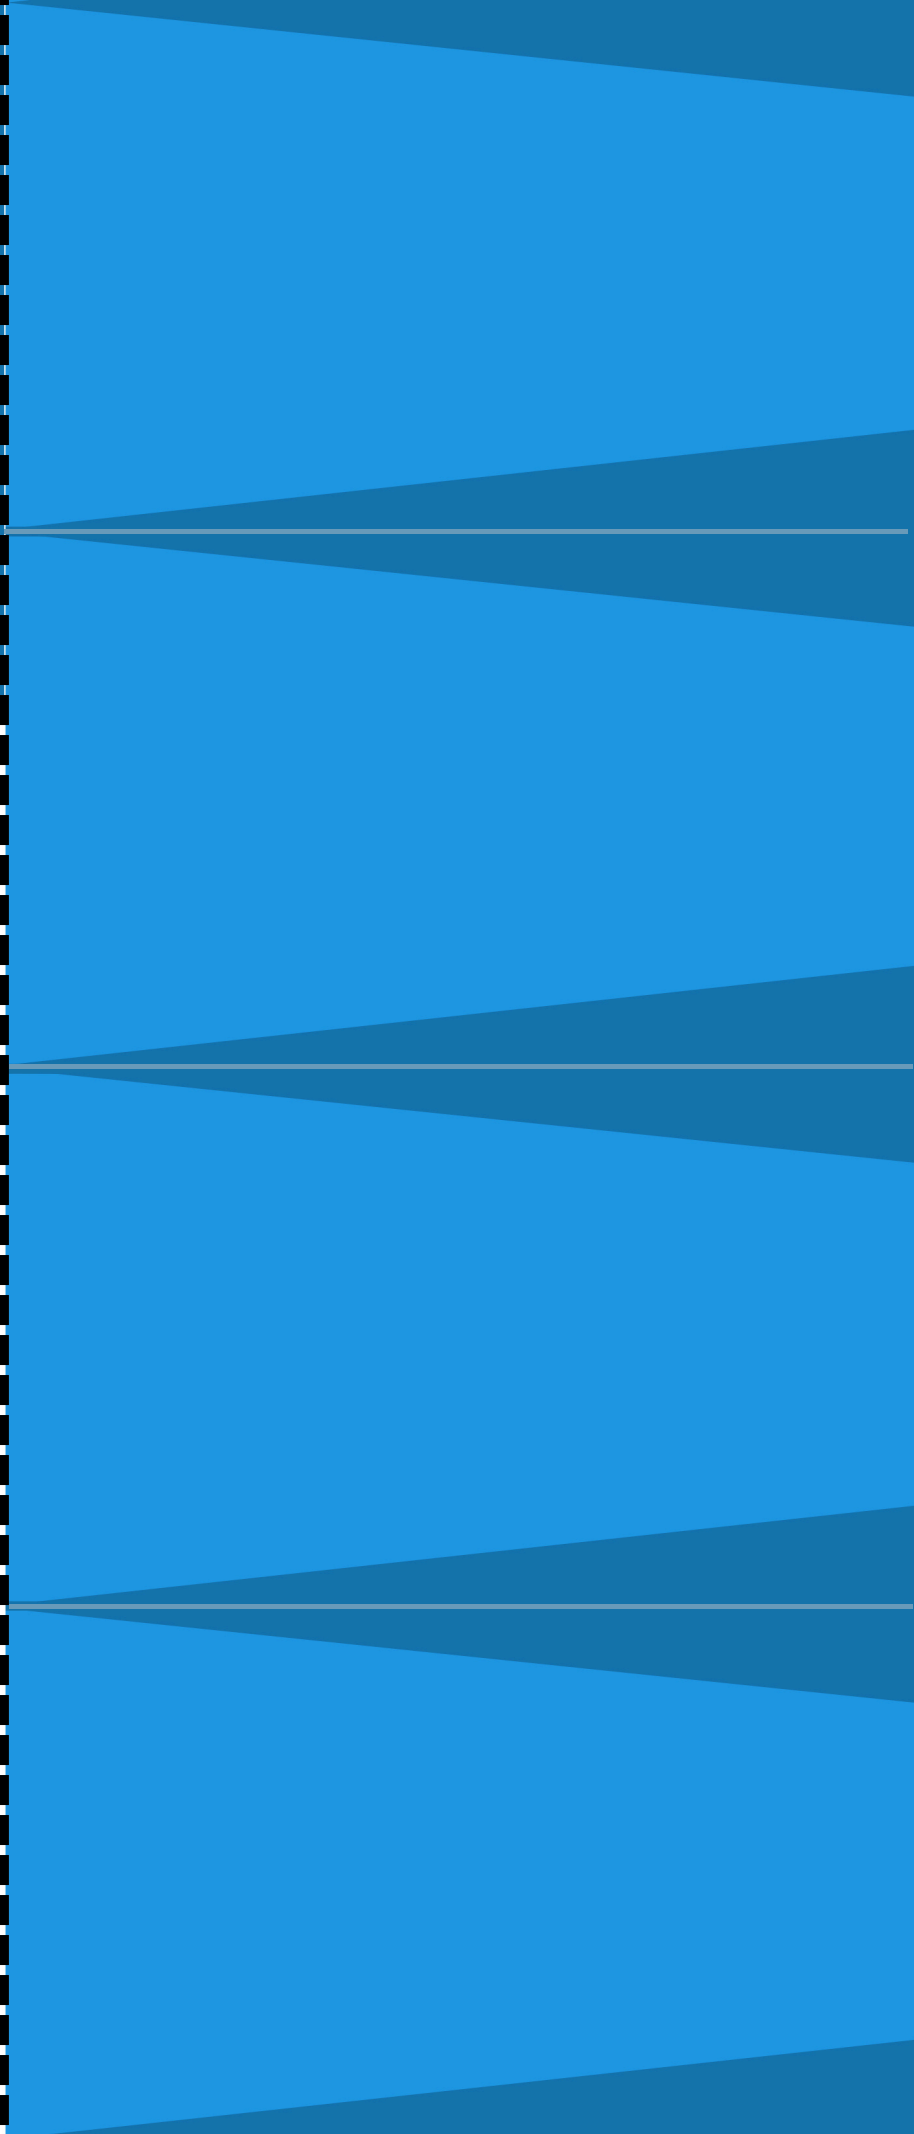

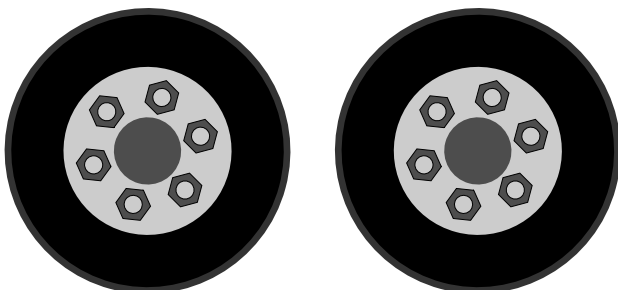

★ Cut along dashed lines. Fold the bin body and glue tab to keep secure.

★ Cut out lid and cut along dashed lines, glue together to form the lid shape. Stick the lid to the edge of bin to look like it's open.

★ Cut out each wheel and glue to sides of bin

★ Cut out recycle sign and stick to the side or front. Think about drawing eyes and mouth to give your pencil pot character :)

**fold and glue**
