

# Make a Pop-Up Pumpkin

## Items you will need

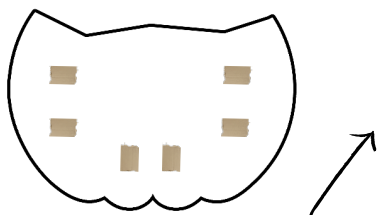

## Instructions (your grown-up can help)

1. Take your pumpkin template card, design the face and colour in. When you are finished, cut out the lid.

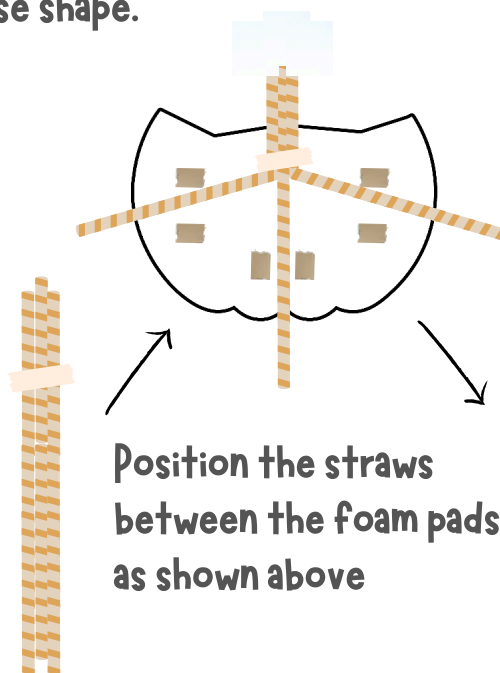

2. Trace around your pumpkin base onto a piece of plain card, then cut this out too. You should now have 3 pieces. A colour pumpkin face, a pumpkin lid and a plain pumpkin base shape.

3. Stick 6 foam pads to the pumpkin base-shape

Wrap a piece of masking tape around the 3 straws near the top

Position the straws between the foam pads as shown above

Peel tape from pads and stick on the decorated pumpkin

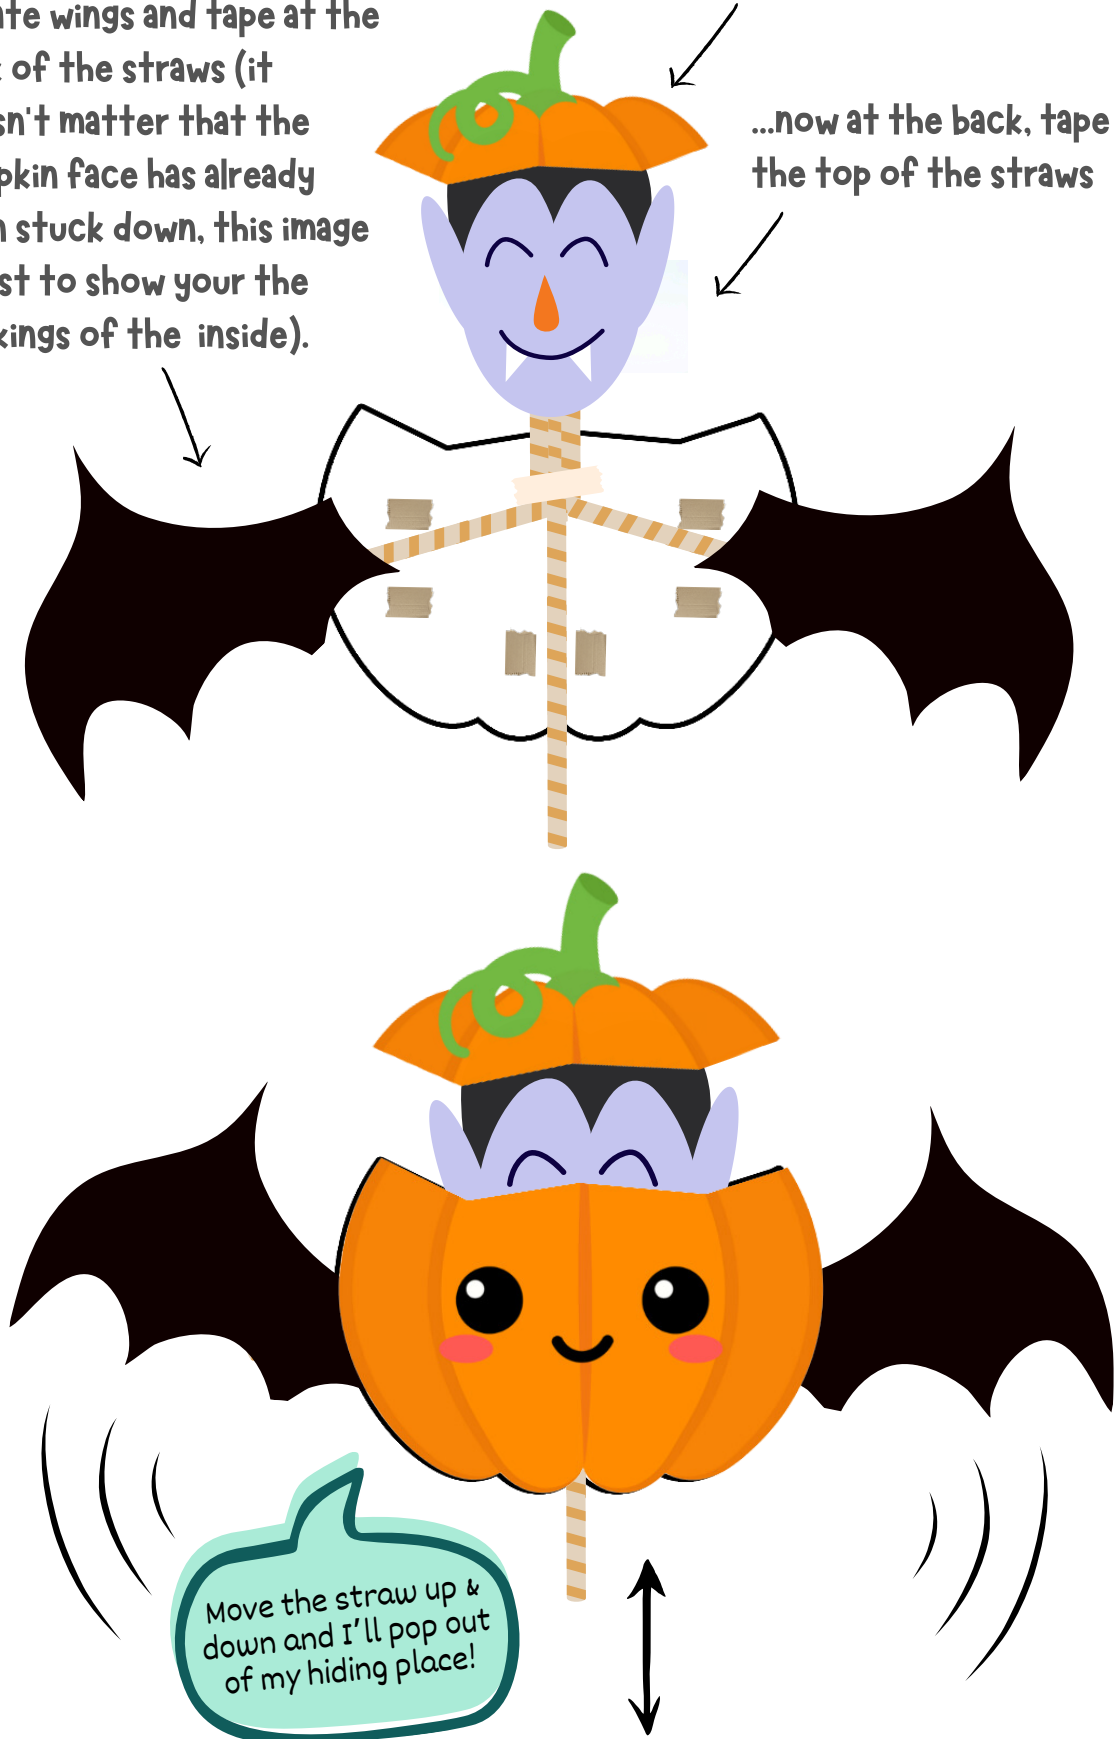

4. You can draw faces and wings or any other design that you would like to move when you pull (gently) the central straw at the bottom of your amazing creation!

## Example

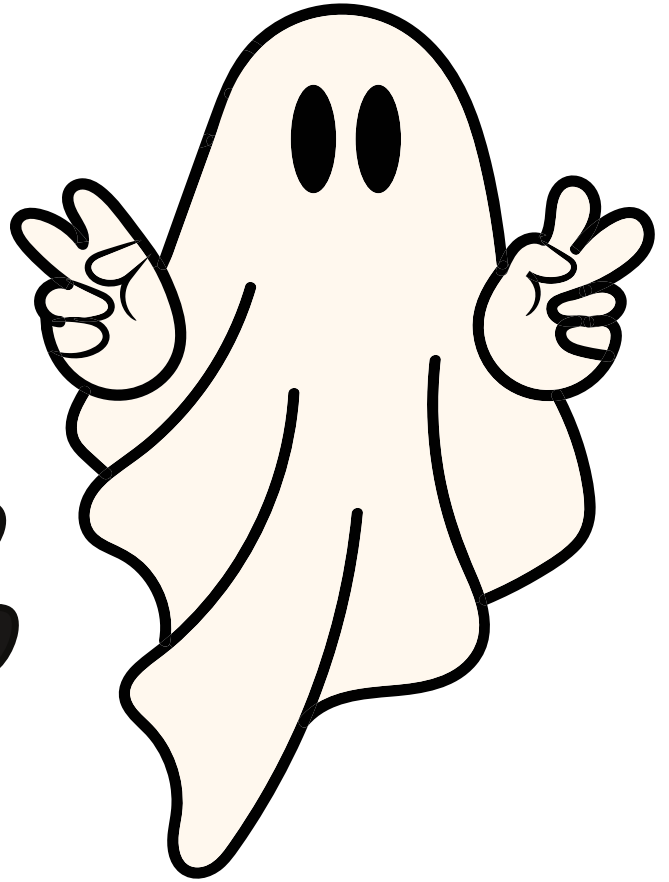

Create wings and tape at the back of the straws (it doesn't matter that the pumpkin face has already been stuck down, this image is just to show you the workings of the inside).

Draw and cut out a face on the spare card and stick the pumpkin lid on top...

...now at the back, tape this to the top of the straws
